

My name is Mohamed Alaa, a fifth-year medical student.

I believe that if I want to learn something new, I must try and try, so I find the participation at this Exchange program such a new experience, new knowledge and new development to light the dark side in my life. I have the passion, the experience, motivation and the ability to do my job in the perfect way. I am a hard worker guy that really loves what he does and never quits. I am applying for travelling to Lithuania as I know it will be the most amazing experience that I can get it. I have the ability

to get things done and with my experience and motivation I know I can do it in the perfect way. I have a strong belief in the role of health to develop our country and benefit our community.

I came to Lithuania a research scholarship about immunohistochemistry and intrinsic innervation of the heart which I had little knowledge about.

Actually it was an amazing experiment, I got benefit knowledge and practice and I met great doctors.

It was more than I anticipated

Thanks for all doctors whom I worked with

And special thanks for

Prof. Neringa Pauziene

Prof. Dainius H. Pauza

Dr. Tomas Ragauskas

Dr. Aiste Masaityte

Sincerely yours, Muhammad Alaa Aldein Muhammad

Fifth year student at Faculty of Medicine Alazhar University

Obour city, Qalubyyia
